DATE MAILED: 10/06/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	09/821,533	SMEETS ET AL.	
	Examiner	Art Unit	
	Courtney D. Fields	2137	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 29 March 2001.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-50 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1-50 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All b) Some * c) None of:
1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-50 are rejected under 35 U.S.C. 102(e) as being anticipated by Osborn (U.S. Patent No. 6,026,293). Referring to the rejection of claims 1 and 37, Osborn discloses a method and system for providing controlled access to a desired function which includes functions having a corresponding key comprising: selecting a key corresponding to the desired function, conducting an authentication process which includes using the selected key, and controlling access to the desired function according to a result of the authentication process in Column 6, lines 50-60, Column 8, lines 19-62.

As per claim 2, Osborn discloses the claimed limitation wherein the step of an entity requesting access to the desired function in the system prior to the step of selecting a key in Column 6, lines 46-50.

As per claims 3 and 38, Osborn discloses the claimed limitation wherein each of the corresponding keys comprises a public key in Column 10, lines 14-17.

Art Unit: 2137

As per claims 4 and 24, Osborn discloses the claimed limitation wherein each of the corresponding keys, authentication code, and codes for plurality of functions are stored in a memory of the system in Column 15, lines 20-24.

As per claims 5,25,39, and 47, Osborn discloses the claimed limitation wherein the memory comprises an internal read-only memory (IROM) in Column 7, lines 65-67.

As per claims 6,26,40, and 48, Osborn discloses the claimed limitation wherein the memory comprises a one-time programmable part of a non-volatile program memory in Column 3, lines 66-67, Column 7, lines 1-2.

As per claims 7 and 41, Osborn discloses the claimed limitation wherein the step of conducting an authentication process comprises the step of conducting a first authentication process which includes using a first selected key, and wherein the method further includes the step of conducting a second authentication process which includes using a second key which is generated using a second key code created during the first authentication process in Column 10, lines 24-54.

As per claims 8 and 42, Osborn discloses the claimed limitation wherein the second key comprises a session key computed by the system and an entity seeking access to the desired function in Column 13, lines 36-58.

As per claims 9 and 23, Osborn discloses the claimed limitation wherein the second authentication process includes comparing the session keys computed by the system and the entity, access to the desired function by the entity being authorized if the compared session keys match in Column 8, lines 19-46.

Art Unit: 2137

As per claim 10, Osborn discloses the claimed limitation wherein the second key code is created using a random challenge sent to the entity by the system during the first authentication process in Column 10, lines 35-54.

As per claims 11,27,43, and 49, Osborn discloses the claimed limitation wherein the second key is stored in a protected static random access memory (PSRAM) of the system in Column 8, lines 2-3, 32-33.

As per claims 12 and 28, Osborn discloses the claimed limitation wherein the step of encrypting and decrypting data sent between the entity and the system using the session key in Column 10, lines 14-23, Column 13, lines 13-51.

As per claims 13 and 29, Osborn discloses the claimed limitation wherein an algorithm code for the encryption and decryption of data is stored in an internal read-only memory (IROM) of the system in Column 7, line 67, Column 8, lines 1-2, and Column 10, lines 14-17.

As per claims 14 and 30, Osborn discloses the claimed limitation wherein an algorithm code for the encryption and decryption of data is stored in a one-time programmable part of a non-volatile memory of said system in Column 13, lines 13-28, Column 15, lines 20-24.

As per claims 15 and 31, Osborn discloses the claimed limitation wherein an algorithm code for the encryption and decryption of data is stored in the entity in Column 12, lines 56-67.

As per claims 16 and 32, Osborn discloses the claimed limitation wherein the step of adding MAC protection for data transmitted between the system and the entity, the MAC protection utilizing the session key in Column 11, lines 51-60.

As per claims 17 and 33, Osborn discloses the claimed limitation wherein an algorithm code for MAC protection is stored in an internal read-only memory (IROM) of the system in Column 14, lines 36-67, Column 15, lines 1-32.

As per claims 18 and 34, Osborn discloses the claimed limitation wherein an algorithm code for MAC protection is stored in a one-time programmable part of a non-volatile memory of said system in Column 9, lines 5-9.

As per claims 19 and 35, Osborn discloses the claimed limitation wherein an algorithm code for MAC protection is stored in the entity in Column 15, lines 20-24.

As per claims 20,36,44, and 50, Osborn discloses the claimed limitation wherein the system comprises a cellular telephone system in Column 7, lines 60-61, and Figure 4.

As per claims 21 and 45, Osborn discloses a method and system for providing controlled access to a desired function in a system which includes one or more functions, comprising: conducting a first authentication process with an external entity which includes using a first key corresponding to the desired function, conducting a second authentication process using a second key which is generated based on a random challenge made by the system to the external entity during the first authentication process, and a random challenge made by the system to the external entity during the first authentication, and controlling access to the desired function

Art Unit: 2137

according to a result of the first and second authentication process in Column 10, lines 14-67, Column 11, lines 1-41

As per claims 22 and 46, Osborn discloses the claimed limitation wherein the first key comprises a public key and the second key comprises a private session key shared by the system and the external entity in Column 13, lines 13-28, Column 14, lines 9-31.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kari et al. (U.S. Patent No. 6,636,491) discloses an access control method for a mobile communications system.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Courtney D. Fields whose telephone number is 571-272-3871. The examiner can normally be reached on Mon - Wed. 6:00 - 6:00 pm; Thur. 6:00 - 10 am.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Caldwell can be reached on 571-272-3868. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
